# Home preparation for emergency doses of

Doxycycline

for infants and children exposed to plague

Once you have been notified by your federal, state, or local authorities that you have been exposed to plague, it may be necessary to prepare **emergency** doses of doxycycline for infants and children using doxycycline tablets.

## You will need:

- One (1) 100 milligram (mg) doxycycline tablet
- Metal teaspoon
- Measuring spoons [1 teaspoon (tsp); and ½ teaspoon (tsp)] (NOTE measuring spoons are preferred, however if not available, use the metal spoon to grind, measure and give the medicine)
- 1 small bowl
- One of these foods
  - chocolate syrup
  - maple syrup
  - caramel syrup
  - applesauce

### **Directions:**

1. Put one (1) 100-mg doxycycline tablet into a small bowl. Crush the tablet with the back of the metal spoon until no large pieces are seen.

2. Add four (4) level teaspoons (tsp) of a food to the crushed doxycycline. Stir them together until the drug looks evenly mixed with the food.

### How Much of the Doxycycline Mixture to Give a Child

The number of teaspoons of the doxycycline mixture to give a child depends on the child's weight. <u>If child's weight is unknown, weigh child before</u> <u>giving the first dose.</u> The chart tells you how much to give the child for one dose. You should give the child <u>two doses</u> each day (one in the morning and one in the afternoon) for 7 days.

| If the child weighs  | Give the child  |
|--|---|
| 4 – 11 pounds<br>(lbs.)  | One half (1/2) teaspoon (tsp) (2.5mL) of the doxycycline mixture                                  |
| 12 – 22 (lbs.)   | One (1) teaspoon (5mL) of the<br>doxycycline mixture  |
| 23 – 33 (lbs.)   | One and one half (1 1/2) teaspoons (7.5mL) of the<br>doxycycline mixture                          |
| 34 - 45 (lbs.)   | Two (2) teaspoons (10mL) of the<br>doxycycline mixture  |
| 46 - 55 (lbs.)   | Two and one half (2 <sup>1</sup> / <sub>2</sub> ) teaspoons (12.5mL) of the doxycycline mixture   |
| 56 - 65 (lbs.)   | Three (3) teaspoons (15mL) of the<br>doxycycline mixture  |
| 66 - 77 (lbs.)   | Three and one half (3 <sup>1</sup> / <sub>2</sub> ) teaspoons (17.5mL) of the doxycycline mixture |
| 78 - 88 (lbs.)   | Four (4) teaspoons (20mL) of the<br>doxycycline mixture (or 1 tablet)                             |
| Children heavier than 88 pounds who are exposed to plague<br>should take one (1) 100-mg tablet of doxycycline two times a day<br>(at the same time each day if possible) <b>for 7 days</b> . If the child cannot<br>swallow tablets, use the directions for preparing a mixture and give 4<br>teaspoons twice a day. |   |

## How already prepared Doxycycline mixture should be stored

- Prepare the doxycycline mixture daily; store in covered container and refrigerate.
- Doxcycline mixed with any of the recommended foods will keep for at least 24 hours.
- Throw away any unused portions.
