

MOBILE PUSHCARTS

CONSTRUCTION, EQUIPMENT AND OPERATION GUIDANCE

Mobile pushcarts shall comply with all applicable requirements. This document is just a quick reference tool and may not include all requirements set forth in Oklahoma Administrative Code (OAC) 310:257. A plan review application is required prior to construction & licensure, unless only prepackaged food is sold and there is no plumbing. Mobile pushcarts shall be readily moveable and may remain at one physical address for no more than 12 hours at one time, unless in conjunction with a single event or celebration. Local ordinances may impose additional limitations.

A MOBILE PUSHCART: is a non-self-propelled food unit that can be <u>manually</u> moved by one (1) average adult person. Pushcarts shall not cook raw meat or poultry, must have hand washing facilities on or immediately adjacent to pushcart, and have mechanical refrigeration and/or hot holding units if serving open TCS foods[OAC 310:257-1-2, & 17-2]. Mobile pushcarts are exempt from mechanical refrigeration if able to maintain food products at temperature of 41°F or less and serves only prepackaged food OAC:310:257-17-1(c).

HOT WATER TEMP: A hand-washing lavatory shall provide water at a temperature of at least 100°F. If tempered water is used, water shall be no greater than 120°F. Hand soap, disposable hand towels, and waste receptacles shall be available for use at the hand sink. BACKFLOW PREVENTION: A backflow prevention device shall be required on the water system at the point	257-17-3.1 / 17-5 OAC 310:257 257-9-1 257-9-8 257-9-32 / 9-35 257-9-40 / 9-39 257-9-12 257-9-14 / 9-60 /
storage of pre-packaged foods and/or cleaning of units they are exempt from licensure; but a commissary must still be identified and cannot service more than one (1) unit. CLEANING / SERVICING: Mobile pushcarts shall report at least daily to their commissary for cleaning and servicing operations, unless associated with an event. Within this servicing area, there shall be a location provided for the flushing and draining of liquid wastes to an approved sanitary sewage disposal system, and be able to dispose of water in a manner that properly collects grease laden waste water. WATER, PLUMBING, & WASTEWATER SYSTEM APPROVED SOURCE: Water used shall come from an approved source. SUFFICIENT WATER: Pushcarts shall have a minimum capacity of at least 5 gallons of water and hot water generation and distribution systems shall be sufficient to meet the peak demands. WATER PRESSURE: Units shall have a water system under pressure that produces a flow rate of at least 2 gallons per minute. WATER TANK: A mobile water tank shall be enclosed from the filling inlet to the discharge outlet and sloped to an outlet that allows complete drainage of the tank. If a vent is provided, it shall terminate in a downward direction and shall be covered with 16 to 1 inch mesh screen or a protective filter. WATER TANK INLET: A water tank inlet shall be at least ¾ inch in diameter or less and provided with a hose connection of a size or type that will prevent its use for any other service. Protective covers shall be required for water inlets and outlet hoses. PLUMBING SYSTEM: A plumbing system and hoses shall be constructed and repaired with approved materials. HOT WATER TEMP: A hand-washing lavatory shall provide water at a temperature of at least 100°F. If tempered water is used, water shall be no greater than 120°F. Hand soap, disposable hand towels, and waste receptacles shall be available for use at the hand sink.	257-17-3.1 / 17-5 OAC 310:257 257-9-1 257-9-8 257-9-9 257-9-32 / 9-35 257-9-40 / 9-39 257-9-12 257-9-14 / 9-60 / 11-24 / 11-25

resistant, non-absorbent, made of food grade materials, have a smooth interior surface, and be clearly and

durably identified as to its use if not permanently attached.

WASTEWATER TANK: A wastewater holding tank shall be sized at least 15% larger in capacity than the water supply tank and be sloped to a drain outlet that is at least 1 inch in diameter or greater, and equipped with a shut-off valve. If connected to a permanent water supply, the establishment shall be connected to a permanent sewage system.	<u>257-9-45</u>
APPROVED WASTE SYSTEM: Liquid waste shall be conveyed to the point of disposal through an approved	257-9-49 / 9-50
sanitary sewage system. This shall be done at an approved waste servicing area or vehicle in a way that a	
public health hazard or nuisance is not created.	
LABELING: Piping in a mobile system shall be labeled to prevent cross-contamination.	257-9-27(b)
PROPER MATERIALS: Materials that are used in the construction of a mobile pushcart water tank, mobile	<u>257-9-31</u>
food establishment water tank, and appurtenances shall be safe, durable, and be smooth and easily	
cleanable.	

Prior to attending a scheduled event, you should contact the event organizer to determine if adequate power, water and waste disposal facilities are provided onsite. In some cases, you may be required to provide those needs yourself.
